

## Do You Need Answers Fast? Speed up Your Cannabis Testing with Sartorius Solutions

Discover How  
Our Solutions Can  
Accelerate Your  
Analysis

### Sartorius Enables Fast, Precise and Reliable Results in Your Cannabis Analysis

States which have passed laws permitting usage of medicinal and recreational Cannabis products are also calling for rigorous testing of cannabis derivatives to ensure consumers' safety.

Sartorius products not only support you in performing super-fast determination of your samples' moisture and weight, but also in the process of safely preparing of your samples for analytical or microbiological analysis.

Get in touch with our specialists for expert advice on a specific need, or discover our solutions here:

## Super-fast Determination of the Moisture Content of Cannabis as a Crucial Indicator of Potential Microbial Contamination

- Flexible, fully automated, easy to use Infrared Moisture Analyzer MA160 for reliable and traceable results in the shortest possible time
- Get accurate measurements to determine the water content in cured cannabis, raw cannabis or other edible products for quality control
- Get accurate moisture results during sample preparation for analytics or CO<sub>2</sub> extraction without waiting for hours
- Say goodbye to time-consuming measurements with a drying oven and opt in on using a fully automatic moisture analyzer instead

## Analytical Cannabis Testing: Accurate and Consistent Lab Work Deserves Reliable and Precise Equipment and Best in Class Sample Prep

- Test for pesticides, mycotoxins, residual solvents, heavy metals, terpenes or potency
- Get the highest sensitivity and performance in terms of your analytical equipment
- Rely on the best quality of your samples as the best analysis starts with the best sample prep

**MA160 Moisture Analyzers**  
Specify mass and moisture content of your samples using super-fast moisture analyzers.

**Centrisart® Centrifuges**  
Remove coarse fiber material in an easy and economical way.

**Tacta® Pipettes**  
Flow your work with robust and accurate pipettes, tips and bottle top dispensers.

**Cubis® MSA Dosing System**  
Simplify your workflows with the automatic preparation and documentation of 100% comparable analytical standards for Cannabis testing.

**arium® Lab Water Systems**  
Use ultrapure water to prepare your samples and run your chromatography tests.

**minisart® Syringe Filters**  
Simply and safely remove solids from your sample with syringe filters.

**Quintix® Balances**  
Choose from a range of intuitive lab balances to get the best weighing results and optimized workflows.
